Std Color: Black Polish (BP)	
Optional Color:	N/A
Anodize Lip:	Black
	Red
	Blue
	Bronze

Three piece wheel offset is determined by the combination of three components, Outer Barrel, Inner Barrel and Center Disk. To understand the chart. (i.e. 15 X 7 0 +35 A-Disk has 32mm lip size). The different center disks has different disk thickness, therefore it alter the final offset value. (i.e. 15 X 7.0 with 32mm lip in A-Disk is +35 offset, but when you change over to O-Disk, the offset change to +45). This is because the A-Disk 10mm thicker then O-Disk. Why we do this? A-Disk has 10mm of extra brake clearance over O-Disk.
